- To order additional/replacement accessories, call 1-800-332-5368.
- TTY users (hearing or speech impaired users) can call 1-866-605-1277.

When using the product, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or personal injury.

1. Read all instructions carefully.
2. Follow all warnings and instructions marked on the product.
3. Unplug the product from power outlets before cleaning. Do not use liquid or aerosol cleaners. Use a moist cloth for cleaning.
4. Do not use the product near water, for example near a bathtub, wash bowl, kitchen sink, etc.
5. Place the product securely on a stable surface. Serious damage and/or injury may result if the product falls.
6. Do not cover slots and openings on the product. They are provided for ventilation and protection against overheating. Never place the product near radiators, or in a place where proper ventilation is not provided.
7. Use only the power source marked on the product. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
8. Do not place objects on the power cord. Install the product where no one can step or trip on the cord.
9. Do not overload power outlets and extension cords. This can result in the risk of fire or electric shock.
10. Never push any objects through slots in the product. This may result in the risk of fire or electric shock. Never spill any liquid on the product.
11. To reduce the risk of electric shock, do not disassemble the product. Take the product to an authorized service center when service is required. Opening or removing

covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the product is subsequently used.

12. Unplug the product from power outlets and take to an authorized service center when the following conditions occur:
  - A. When the power cord is damaged or frayed.
  - B. If liquid has been spilled into the product.
  - C. If the product has been exposed to rain or water.
  - D. If the product does not work normally by following the operating instructions. Adjust only controls covered by the operating instructions. Improper adjustment may require extensive work by an authorized service center.
  - E. If the product has been dropped or physically damaged.
  - F. If the product exhibits a distinct change in performance.
13. During thunderstorms, avoid using telephones except cordless types. There may be a remote risk of an electric shock from lightning.
14. Do not use the product to report a gas leak, when in the vicinity of the leak.

## SAVE THESE INSTRUCTIONS

- Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.
- Never touch uninsulated telephone wires or terminals unless the

telephone line has been disconnected at the network interface.

- Use caution when installing or modifying telephone lines.
- Do not touch the plug with wet hands.
- The AC adaptor is used as the main disconnect device. Ensure that the AC outlet is installed near the product and is easily accessible.

To reduce the risk of fire or injury to persons, read and follow these instructions.

- Use only the battery specified.
- Do not dispose of the battery in a fire. It may explode. Check with local waste management codes for special disposal instructions.
- Do not open or mutilate the battery. Released electrolyte is corrosive and may cause burns or injury to the eyes or skin. The electrolyte may be toxic if swallowed.
- Exercise care when handling the battery in order not to short the battery to conductive materials such as rings, bracelets, and keys. The battery and/or conductor may overheat and cause burns.
- Do not recharge the battery provided with or identified for use with the product. The battery may leak corrosive electrolyte or explode.
- Do not attempt to rejuvenate the battery provided with or identified for use with the product by heating. Sudden release of battery electrolyte may occur causing burns or irritation to the eyes or skin.
- Remove the battery from the product if the product will not be used for a long period of time (several months or more). During this time the battery could leak in the product.
- Discard the "dead" battery as soon as possible. The "dead" battery may leak in the product.

- Do not store the product, or the battery provided with or identified for use with the product, in high temperature areas. A battery that is stored in a freezer or refrigerator for the purpose of extending shelf life should be protected from condensation during storage and defrosting. A battery should be stabilized at room temperature prior to use after cold storage.

- To prevent the risk of fire or electrical shock, do not expose the product to rain or any type of moisture.
- Unplug the product from power outlets if it emits smoke, an abnormal smell, or makes an unusual noise. These conditions can cause fire or electric shock. Confirm that smoke has stopped emitting and contact the Panasonic Call Center at 1-800-211-PANA (1-800-211-7262).

- 
- Keep the product away from electrical noise generating devices, such as fluorescent lamps and motors.
  - The product should be kept free from excessive smoke, dust, high temperature, and vibration.
  - The product should not be exposed to direct sunlight.
  - Do not place heavy objects on top of the product.
  - When you leave the product unused for a long period of time, unplug the product from the power outlet.
  - The product should be kept away from heat sources such as heaters, kitchen stoves, etc. It should not be placed in rooms where the temperature is less than 5 °C (41 °F) or greater than 40 °C (104 °F). Damp basements should also be avoided.
- 

- Wipe the outer surface of the product with a soft moist cloth. Do not use benzine, thinner, or any abrasive powder.

— The current date and time

— The extension number of this phone

— Message waiting information on line 1, line 3, and line 4

Install a 9 V Alkaline (6LR61) battery (sold separately) in the battery compartment. It works as emergency power during a power failure. The unit will work as a standard telephone, so that you can make or answer outside calls with the handset. (You cannot use the speakerphone, intercom, etc.)

Open the battery cover by sliding in the direction of arrow (①), and take out the battery snap (②).

Match the polarity and snap the battery to the battery snap as shown.

Place the battery into the battery compartment.

Dress the battery snap wire, and close the battery cover.

- Please refer to “Battery” on page 7 for correct battery usage.
- When the display shows “LOW BATT” with a 9 V battery in the unit, the battery needs to be changed immediately. If the battery level is too low, all LEDs might light up or flash

and the unit is not guaranteed to perform as normal during a power failure. Replacing with a fresh battery will restore normal function.

- The Manganese (6F22) battery can be used but operating time when using it will be dramatically shortened.
- It is recommended that the battery is replaced annually.
- It is recommended that the battery is replaced after a power outage.
- The battery operating time may depend on usage conditions, ambient temperature, and battery quality.
- During a power failure the battery will retain the clock memory (see “Date and time” on page 24) and the redial memory (see “Making a call using the redial list” on page 25). If you do not install the battery, the data in memory will be lost during a power failure.
- When storing or disposing of the battery, please cover the positive (+) and negative (−) terminals with tape.

Disconnect the telephone line cord(s) before opening the battery cover.

- You do not need to disconnect the AC adaptor, otherwise the clock memory and the redial memory will be lost.
- Please refer to “Battery” on page 7 for correct battery usage.

The battery works as during a power failure.

While in use (talking)	Approx. 3 hours
While not in use (standby)	Approx. 4 hours

This unit can be used in 3 positions.

---

You can attach the wall mounting adaptor to slope this unit.

- To attach the wall mounting adaptor, push it in the direction of the arrows (① and ②) as shown.

See “Wall mounting” on page 67 for details.

For this connection, please purchase two Panasonic 2-line adaptors KX-J24 and two 2-wire telephone line cords (Order No. PQJA10075Z) (see “Additional/replacement accessories” on page 5).

\*1 2-line adaptor merges a 2-wire (single line) telephone outlet with another 2-wire (single line) telephone line onto a single 4-wire (2-line) telephone line cord.

## Preparation

Please attach a noise filter (contact your DSL provider) to the telephone line between the unit and the telephone line jack in the event of the following:

- Noise is heard during conversations.
- Caller ID features (see “Using Caller ID service” on page 43) do not function properly.

For this connection, please purchase a Panasonic 2-line splitter KX-J42 and two 2-wire telephone line cords (Order No. PQJA10075Z) (see “Additional/replacement accessories” on page 5).

Example: DSL line is LINE2.

and three  
placement

ds

\*1 2-line adaptor module connects a single line (single line) telephone outlet with another 2-wire (single line) telephone line cord onto a single 4-wire (2-line) telephone line cord.

If you have more than 2 system phones (KX-TS4100/KX-TS4200/KX-TS4300) and use more than 4 lines in your system phones, you can set up the line group to work correctly with the units. To program the line group, see “Line group” on page 52.

- You can set up the line group only for LINE4.

- You can set up the line group unconnected from other extensions (private line). To program the private line, see “Line group” on page 52.

**Preparation**

After connecting the telephone line cords to two-line telephone jacks, you can connect a communication device (computer, modem, fax, etc.) through this unit using the LINE2 or LINE4 jacks.

Two-line

[SET]:Save  
[▼/▲]:Change

Press and hold [ ] to return to standby mode.

- To return to the previous menu, press [◀◀].
- Incoming intercom calls use Type-1 and cannot be changed.

You will not hear call rings or paging when this feature is activated. The line indicator flashes for outside calls and the INTERCOM indicator flashes for intercom calls.

Press [ ] to turn on/off the Do Not Disturb (DND) feature.

- When the Do Not Disturb (DND) feature is turned on, the DND indicator lights and the display shows **"DND"**.

03:45P 02/23 MON  
DND 11  
CID:100/198 MSGW  
TAD:12/26 1 34

- When the Do Not Disturb (DND) feature is turned off, the DND indicator goes out.

If you hear beeps during a conversation and another line indicator flashes rapidly, an incoming call is being received. You can answer the 2nd call while holding the 1st call.

Press [ ] to put the 1st call on hold.

- The line indicator flashes.
- If you press the other line button before pressing [ ], the 1st call is disconnected.

To answer a 2nd call, press the relevant line button.

To make a 2nd call, press the other line button or [ ], then dial the phone number.

- The other line indicator lights.

To return to the 1st call, press the line button for the 1st call.

- The 2nd call is disconnected.
  - To hold the 2nd call in step 3, press [ ] before pressing the line button for the 1st call.
- When the Do Not Disturb (DND) feature is turned on, beeps will not be heard during a conversation.
  - To establish a conference call, see "Conference calls" on page 41.

---

Call privacy allows you to prevent other extensions from joining your conversations with outside callers. The phone always keeps call privacy on unless you manually turn this feature off.

---

During the call, press the line button for the call. You will hear a double-beep.

- Any system phones can join the call by pressing the relevant line button.
- 

Press the line button again during the call. You will hear a 3-beep.

- Call privacy will turn on again automatically when you hang up.
  - If a non-system phone is connected on the same line, this feature does not work for the phone.
  - When a non-system phone answers a call, any system phones can join the call by pressing the relevant line button.
- 

This feature allows you to put a call on hold (for an outside call only).

---

During an outside call, press [ ].

- The line indicator flashes.
- If using the handset, you can place it on the cradle.
- To transfer the call to another extension, see "Transferring calls" on page 40.

Press the line button.

- The other extension users can take the call by pressing their line buttons.
- If a call is kept on hold for more than 60 or 120 seconds, an alarm tone starts to sound (hold reminder). To turn off the hold reminder, see "Hold reminder" on page 29.
- If a call is kept on hold for more than 5 minutes, the call is disconnected. To keep a call on hold longer than 5 minutes, release hold before 5 minutes and then place the call on hold again.

This feature reminds you the call is on hold by sounding a 4-tone alarm every 60 or 120 seconds. The default setting is "60 Seconds".

- Make sure that the unit is in standby mode.

Press [ ].

Select "Phone Setup", then press [ ].

Select "Hold Reminder", then press [ ].

→Hold Reminder  
 Handsfree Mode  
 Prime Line  
 [▼/▲]:Scroll

Select the desired setting, then press [ ].

Hold Reminder  
 = 60 Seconds  
 [SET]:Save  
 [▼/▲]:Change

Press and hold [ ] to return to standby mode.

- To return to the previous menu, press [◀◀].

While mute is turned on, you can hear the other party, but the other party cannot hear you.

To mute your voice, press [ ].

- The MUTE indicator lights.
- To return to the conversation, press [ ] again. The MUTE indicator goes out.
- When you switch between the handset and the speakerphone or press [ ], mute will be released.

Pressing [ ] allows you to use special features of your host PBX such as transferring an extension call, or accessing optional telephone services such as Call Waiting.

- To change the flash time, see "Flash time" on page 30.

To use Call Waiting, you must subscribe to Call Waiting service of your telephone service provider.

This feature allows you to receive calls while you are already talking on the phone.

If you receive a call while on the phone, you will hear a Call Waiting tone.

Press [ ] to answer the 2nd call after the tone.

- To switch between calls, press [ ].

- Please contact your telephone service provider for details and availability of this service in your area.

The flash time depends on your telephone exchange or host PBX. You can select the following flash time: 80 ms, 100 ms, 200 ms, 300 ms, 400 ms, 500 ms, 600 ms, and 700 ms. The default setting is "600 ms".

- Make sure that the unit is in standby mode.

Press [  ].

Select "Phone Setup", then press [  ].

Select "Flash Time", then press [  ].

→Flash Time
Hold Reminder
Handsfree Mode

Select the desired setting, then press [  ].

Flash Time
=600 ms
[SET]:Save
[▼/▲]:Change

Press and hold [  ] to return to standby mode.

- To return to the previous menu, press [ **⏮** ].
- If you are connected via a PBX, a longer flash time may be necessary to use PBX functions (transferring a call, etc.). Consult your PBX installer for the correct setting.

You can temporarily switch the dialing mode to tone when you need to access touch tone services (for example, answering services, telephone banking services, etc.).

Press [ **✳** ] (TONE) before entering access numbers which require tone dialing.

You can record your conversation while on an outside call.

During an outside call, press [  ], then press [  ].

To stop recording, press [  ] again.

- Many states have imposed regulations on the manner in which 2-way telephone conversations may be recorded, so you should inform the other party that the conversation is being recorded. Consult your local telephone company for further information.
- Recorded conversations are treated as new messages.
- To listen to the recorded conversation, see "Listening to messages" on page 60.
- If the message memory becomes full, "Memory Full" will blink and recording will stop. Erase unnecessary messages (see "Erasing a message" on page 61).
- The recording time of the telephone conversation does not have limitation.
- If there is no sound recorded for a while, recording mode will end.

You can add up to 200 items to the phonebook and search for phonebook items by name.

- Make sure that the unit is in standby mode.

Press [ **Full** ].

- If the display shows “(Full)”, erase other items from the phonebook (see “Erasing one item in the phonebook” on page 34).

Select “Add New Record”, then press [ **Add** ].

Phonebook (029)  
View Records  
→Add New Record  
[▼/▲]:Scroll

- The total number of items in the phonebook are shown on the display.
- If there are no items in the phonebook, the display will show “(Empty)”.

Enter the name (max. 16 characters; see “Character table” on page 31).

Select “Done”, then press [ **Done** ].

- To cancel, select “Cancel”, then press [ **Cancel** ].

Enter the phone number (max. 24 digits).

- If required, you can insert [ **\*** ], [ **#** ] or [ **\*** ] (TONE) in a phone number.
- To add the last number dialed, you can press [ **Last** ] instead of entering the phone number.

Select “Done”, then press

[ **Done** ].

- To cancel, select “Cancel”, then press [ **Cancel** ].
- To add other items, repeat from step 2.

Press [ **Standby** ] to return to standby mode.

- To return to the previous menu, press [ **Back** ].

[ <b>#</b> ]	#

- To enter another character that is located on the same dial key, first press [ **Next** ] to move the cursor to the next space.

Press [ **Back** ] or [ **Next** ] to move the cursor to the character or number you want to erase, then press [ **Erase** ]. Enter the appropriate character or number.

- Make sure that the unit is in standby mode.

Press [ ].

Select "View Records", then press [ ].

Press [▼] or [▲] to select the desired item, then press [ ].

- To search for the item by initial, see "Searching for a name by initial" on page 33.

Select "Copy To SPD", then press [ ].

Press the speed dial button ([ ] to [ ]).

OR

Press [ ], then press the speed dial button ([ ] to [ ]).

Press [ ] to return to standby mode.

- To return to the previous menu, press [◀◀].
- If the speed dial has already stored the content, you can select whether it should be replaced or not. To replace current content, select "Yes?", then press [ ]. To keep original content, select "No?", then press [ ].

- Make sure that the unit is in standby mode.

Press [ ].

Press [▼] or [▲] to select the desired number, then press [ ].

Select "Copy To PhBook", then press [ ].

Enter the name (max. 16 characters; see "Character table" on page 31).

Select "Done", then press [ ].

- To cancel, select "Cancel", then press [ ].

Edit the phone number if necessary.

- If required, you can insert [ ], [ ] or [✱] (TONE) in a phone number.

Select "Done", then press [ ].

- To cancel, select "Cancel", then press [ ].

Press [ ] to return to standby mode.

- To return to the previous menu, press [◀◀].

Phonebook items can be searched for alphabetically by scrolling through the phonebook items or by entering the first initial.

Press [ ].

Select **"View Records"**, then press [ ].

Press [▼] or [▲] to select the desired item.

Lift the handset or press [ ] or a line button to dial the phone number.

Press [ ].

Press the dialing key ([ ] to [ ], [ # ], or [ \* ]) that corresponds to the first letter you are searching for (see "Character table" on page 31).

**"LISA"**

Press [ ] repeatedly to display the first phonebook entry starting with the initial **"L"** and go to step 3.

- If there is no item corresponding to the letter you selected, **"No Entries"** is displayed.

Press [▼] or [▲] to select the desired item.

Lift the handset or press [ ] or a line button to dial the phone number.

- Make sure that the unit is in standby mode.

Press [ ].

Select **"View Records"**, then press [ ].

Press [▼] or [▲] to select the desired item, then press [ ].

- To search for the item by initial, see "Searching for a name by initial" on page 33.

Select **"Edit"**, then press [ ].

Edit the name if necessary (see "Character table" on page 31).

Select **"Done"**, then press [ ].

- To cancel, select **"Cancel"**, then press [ ].

Edit the phone number if necessary.

- If required, you can insert [ ], [ ] or [ \* ] (TONE) in a phone number.

Select **"Done"**, then press [ ].

- To cancel, select **"Cancel"**, then press [ ].

Press [ ] to return to standby mode.

- To return to the previous menu, press [◀◀].

- Make sure that the unit is in standby mode.

Press [                      ].

Select "View Records", then press [                      ].

Press [▼] or [▲] to select the desired item, then press [                      ].

### CO Call

Press the desired speed dial button ([ ] to [ ]).

OR

Press [ ], then press the desired speed dial button ([ ] to [ ]).

### Intercom DSS

Lift the handset or press [ ] or a line button.

Press the desired speed dial button ([ ] to [ ]).

OR

Press [ ], then press the desired speed dial button ([ ] to [ ]).

### Preview Memory

Press the desired speed dial button ([ ] to [ ]).

OR

Press [ ], then press the desired speed dial button ([ ] to [ ]).

- You can review the entries by pressing [▼] or [▲].

Lift the handset or press [ ] or a line button.

---

A 2-way intercom can be set up between two extensions. Make sure that each extension has been assigned the number ("11" to "26", see "Extension No." on page 23) and is connected to the LINE1/2 and LINE3/4 telephone jacks of the unit (page 15, 16, 17).

- If you press the line button during an intercom call (paging), the intercom call (paging) is disconnected and you can make or answer an outside call.
- 

Press [                      ].

- The INTERCOM indicator lights.
- The SP-PHONE indicator lights and the speakerphone turns on.

Lift the handset.

- The SP-PHONE indicator goes out.

Press the speed dial (extension) button or enter the extension number.

To end the intercom call, place the handset on the cradle.

- The INTERCOM indicator goes out.
- 

Press [                      ].

- The INTERCOM indicator lights.
- The SP-PHONE indicator lights and the speakerphone turns on.

Press the speed dial (extension) button or enter the extension number.

To end the intercom call, press [                      ] or [                      ].

- The INTERCOM and the SP-PHONE indicators go out.
- 

### Intercom DSS

Press the speed dial (extension) button.

- The INTERCOM indicator lights.
- The SP-PHONE indicator lights and the speakerphone turns on.

To end the intercom call, press [                      ] or [                      ].

- The INTERCOM and the SP-PHONE indicators go out.
- 

The INTERCOM indicator flashes rapidly and the extension number of the caller is displayed.

Lift the handset or press [                      ] or [                      ].

---

Any extensions can answer the intercom call directed to another extension.

Press [                      ].

- Turn Do Not Disturb (DND) off at the destination extension (see “Turning Do Not Disturb (DND) on/off” on page 27).

Press [ ] 2 times.

- The INTERCOM indicator lights.
- The SP-PHONE indicator lights and the speakerphone turns on.

Press the speed dial (extension) button or enter the extension number, then speak into the MIC or the handset.

- The destination extension does not ring, instead it will beep 3 times.
- You can make an intercom call by pressing [ ].

To end the paging, place the handset on the cradle or press [ ].

Lift the handset or press [ ].

Speak into the MIC or the handset.

If this feature is set to off, sounds at the paged extension is heard automatically.

- Make sure that the unit is in standby mode.

Press [ ].

Select “Phone Setup”, then press [ ].

Select “Auto Mute”, then press [ ].

→Auto Mute  
Tone/Pulse  
Flash Time  
[▼/▲]: Scroll

Select the desired setting, then press [ ].

Auto Mute  
=On  
[SET]: Save  
[▼/▲]: Change

Press and hold [ ] to return to standby mode.

- To return to the previous menu, press [◀◀].

- Turn Do Not Disturb (DND) off at the destination extension (see “Turning Do Not Disturb (DND) on/off” on page 27).

Press [ ].

- The INTERCOM indicator lights.
- The SP-PHONE indicator lights and the speakerphone turns on.

Press [ ] to page all extensions, then speak into the MIC or the handset.

- The other extensions will hear your paging voice through the speaker.

To end the paging, place the handset on the cradle or press [ ] or [ ].

- You can only talk with an extension who answers first.

Press [ ].

You can monitor a room using the intercom feature. For example, you can monitor a baby from different areas of the house.

To use this feature, turn auto mute off at the destination extension.

- Turn auto mute off at the destination extension (see “Turning auto mute on/off” on page 39).
- Make sure that the destination unit is in standby mode.

Press [ ] 2 times.

- The INTERCOM indicator lights.
- The SP-PHONE indicator lights and the speakerphone turns on.

Press the speed dial (extension) button or enter the extension number.

- The destination extension does not ring, instead it will beep 3 times.
- Your unit starts to monitor the room through the extension.
- If necessary, you can mute your sound output by pressing [ ].

To end monitoring, press

[ ] or place the handset on the cradle.

- To avoid being monitored and keep privacy, turn Do Not Disturb (DND) on.
- The monitored extension user can stop being monitored by pressing [ ] or [ ].

You can transfer an outside call to another extension.

During an outside call, press [ ] to put the call on hold.

Press the speed dial (extension) button or enter the extension number, then place the handset on the cradle.

- If the transferred extension does not answer within 1 minute, the transferred call will ring at all extensions.

- Any extensions can take a transferred call by pressing the relevant line button.
- If a call is kept on hold for more than 60 or 120 seconds, an alarm tone starts to sound (hold reminder). To turn off the hold reminder, see “Hold reminder” on page 29.
- If a call is kept on hold for more than 5 minutes, the call is disconnected.

During an outside call, press [ ] 2 times to put the call on hold.

- You can make an intercom call by pressing [ ].

Press the speed dial (extension) button or enter the extension number.

- If the paged extension does not answer, press the relevant line button.

After the paged extension answers, announce the transfer.

Press [                    ], then place the handset on the cradle.

- If the transferred extension does not answer within 1 minute, the transferred call will ring at all extensions.
- Any extensions can take a transferred call by pressing the relevant line button.
- To page all extensions in step 2, press [    ].
- If a call is kept on hold for more than 60 or 120 seconds, an alarm tone starts to sound (hold reminder). To turn off the hold reminder, see "Hold reminder" on page 29.
- If a call is kept on hold for more than 5 minutes, the call is disconnected.

The line indicator flashes rapidly and the extension number of the caller is displayed.

Lift the handset or press [                    ] or a line button.

Any extensions can answer a transferred call directed to another extension.

Press the relevant line button.

While you are talking with an outside caller, you can make or answer a 2nd call on the other line, and then combine the calls to establish a conference call.

During an outside call, press [                    ].

To answer a 2nd call, press the relevant line button.

To make a 2nd call, press the other line button or [                    ], then dial the phone number.

When the 2nd call is connected, press [                    ] to make a conference call.

- To hang up both lines, place the handset on the cradle or press [                    ].
- To hang up only one line, press the line button for the party with which you want to continue talking.
- To put both lines on hold, press [                    ].
  - To talk with only one caller, press the line button for the party with which you want to continue talking.
  - To resume both lines, press the relevant line button, then press [                    ].

- If a call is kept on hold for more than 60 or 120 seconds, an alarm tone starts to sound (hold reminder). To turn off the hold reminder, see "Hold reminder" on page 29.
- If a call is kept on hold for more than 5 minutes, the call is disconnected.

While you are talking with an outside caller, one more extension can join the conversation and establish a conference call.

During an outside call, press  
【            】 to put the call on hold.

To page another extension, press the speed dial (extension) button or enter the extension number.

When the paged party answers, press 【            】 to make a conference call.

- To hang up both the outside and intercom calls, place the handset on the cradle or press  
【            】. (The other remaining parties on the line can still talk.)
- If a call is kept on hold for more than 60 or 120 seconds, an alarm tone starts to sound (hold reminder). To turn off the hold reminder, see "Hold reminder" on page 29.
- If a call is kept on hold for more than 5 minutes, the call is disconnected.

This unit is Caller ID compatible. To use Caller ID features, you must subscribe to Caller ID service of your telephone service provider.

When an outside call is being received, the date and time of the call, the calling party's name, phone number, and the called line are displayed. Caller information for the last 200 different callers is logged in the caller list by the most recent call to the oldest. When the caller list is full, the oldest call is deleted.

- Generally caller information is displayed from the 2nd ring.

```
03:45P 02/23
Jack Smith
1-555-321-5555
L1
```

You can switch the display by pressing [◀◀] or [▶▶] to check the length of the call.

```
03:45P 02/23 MON
00:29
```

- If the unit cannot receive caller information, the following is displayed:
  - “**Out Of Area**”: The caller dialed from an area which does not provide Caller ID service.
  - “**Private Caller**”: The caller requested not to send caller information.
  - “**Long Distance**”: The caller called you long distance.
- If the unit is connected to a PBX system, caller information may not be received properly. Consult your PBX supplier.

If a call is not answered, the unit treats the call as a missed call. The number of missed calls is shown on the display. This lets you know if you should view the caller list to see who called while you were out.

If you subscribe to both Caller ID and Call Waiting with Caller ID services, the 2nd caller's information is displayed after you hear a Call Waiting tone (see “For Call Waiting service users” on page 29). Please contact your telephone service provider for details and availability of this service in your area.

```
03:45P 02/23
Jack Smith
1-555-321-5555
(Call Waiting)L1
```

If two or more lines receive calls at the same time, only one caller's information can be displayed at a time.

To review the Caller ID of another line, press [◀◀] or [▶▶].

The format of phone numbers displayed will depend on the home and local area codes you programmed into the phone (see “Area codes” on page 45).

- If the incoming call came from your home area code, only the phone number is displayed.
- If the incoming call came from one of your pre-programmed local area codes, the phone number with the local area code prefixed is displayed.
- If the incoming call did not come from any of your area codes, one of the 2 following cases can occur:

- If the phone number is 10 digits, “1” is automatically inserted and display before the phone number.
- If the phone number is less than 10 digits, only the phone number is displayed.

Home area code is set to “999”.

Local area code is set to “888”.

- When a number from “999” area code is received (for example, “999-xxx-xxxx”), it displays as a 7-digit number.

xxx-xxxx

- When a number from “888” (set to one of the local area codes) area code is received (for example, “888-xxx-xxxx”), it displays as a 10-digit number.

888-xxx-xxxx

- When a number from “333” (not set to the local area code) area code is received (for example, “333-xxx-xxxx”), it displays as a 11-digit number.

1-333-xxx-xxxx

- If you are in a region where 10 digits are used to dial within your area code, you are advised to set the home area code to “000” and you must set your area code as a local area code.
- To edit a caller’s phone number, see “Editing a caller’s phone number before calling back” on page 45.

This phone automatically resets the date and time each time new information is received. You can set the date and time yourself if you wish (see “Date and time” on page 24).

- Make sure that the unit is in standby mode.

transferring a call to a different line  
group through line 4 is not allowed.

The Automated Attendant System is a flexible communication tool that can enhance your productivity by improving your call management.

When the Automated Attendant System on this phone is turned on, the phone answers incoming calls with a greeting message and routes the callers to other extensions in the system.

You need to set the day and night times (see "Setting the Automated Attendant System day and night times" on page 54) to use the Automated Attendant System. You can then use the different greeting messages for those times.

- The Automated Attendant System only works with a multi-phone system.

Call is received.

The Automated Attendant System answers the call and play a greeting message.

, the call is transferred to the required extension. the Automated Attendant System plays an auxiliary greeting message.

the Automated Attendant System transfers the call to extension 11.

Three different greeting messages are available. If you do not record your own greeting messages (see "Recording the Automated Attendant System greeting messages" on page 55), the following pre-recorded greeting messages play.

*"Thank you for calling. If you know your party's extension, you may dial it at any time, otherwise please dial zero."*

*"Thank you for calling. We cannot answer your call. If you would like to leave a message to your party's extension, please dial it now, otherwise please dial zero."*

*"Please enter 11 for attendant."*

If you subscribe to a flat-rate service package that includes Caller ID, Call Waiting, Voice Mail, and unlimited local/regional/long distance calls, please note the following:

- To use the Voice Mail service provided by your telephone service provider rather than the unit's answering system, turn off the answering system (see "Turning the answering system on/off" on page 57).
- To use this unit's answering system rather than the Voice Mail service provided by your telephone service provider, please contact your telephone service provider to deactivate your Voice Mail service. If your telephone service provider cannot do this:
  - Set this unit's **"TAD Ans. Delay"** setting so that this unit's answering system answers calls before the Voice Mail service of your telephone service provider does (see "TAD answer delay" on page 57). It is necessary to check the time required to activate the Voice Mail service provided by your telephone service provider before changing this setting.

– Change the time of the Voice Mail service so that the answering system can answer the call first. To do so, consult your telephone service provider.

You can change the maximum message recording time allotted to each caller. The default setting is **"Unlimited"**.

**"Greeting Only"**: The unit plays the greeting message (*"Hello, we are not available now. Thank you for calling."*) but does not record caller messages.

**"1 Minute"**: The caller can record the message up to 1 minute.

- Make sure that the unit is in standby mode.

Press [                      ].

## Useful Information

- To order replacement accessories, call 1-800-332-5368.
- TTY users (hearing or speech impaired users) can call 1-866-605-1277.

Connecting a headset to the unit allows hands-free phone conversations. We recommend using the Panasonic headset noted on page 5.

- Headset shown is KX-TCA88HA.

Press [ ] to make or answer a call.

- If you misdial when making a call, press [ ] and start again from step 1.

To hang up, press [ ].

While using the headset, press [ - ] or [ + ].

Press [ ], then place the handset on the cradle.

When the handset is on the cradle, lift the handset.

When the handset is off-hook, press [ ] again.

Press [ ].

Press [ ].

- If you unplug the headset while the phone is in use, the phone will not automatically switch to speakerphone. You must press [ ] to switch.

This unit can be mounted on a wall phone plate.

Pull down the handset hook until it locks,

Connect the AC adaptor, and dress the AC adaptor cord as shown.

Dress the telephone line cord as shown. Tuck the telephone line cord inside the wall mounting adaptor, then push it in the direction of the arrows (① and ②).

If the backup battery has been discharged during a power failure, the unit will not work. If required, you can connect a standard telephone on LINE 2 or LINE 4 of this unit using the Panasonic T-adaptor KX-J66. To order, call the accessories telephone number on page 5.

Example: Connecting a standard telephone on LINE 4.

\*1 2-line adaptor merges a 2-wire (single line) telephone outlet with another 2-wire (single line) telephone line onto a single 4-wire (2-line) telephone line cord. ☐ & ☐ 662 ☐ (☐)

If the unit detects a problem, one of the following messages is shown on the display.

<p>When a 2nd call is received on the same line, the unit does not display the new caller's information.</p>	<ul style="list-style-type: none"> <li>● You have not subscribed to Caller ID and/or Call Waiting with Caller ID services. Please contact your telephone service provider for details and availability of this service in your area.</li> <li>● If another call is received on the same line while;             <ul style="list-style-type: none"> <li>–the Automated Attendant System or answering system is responding to a call, or</li> <li>–a call is placed on hold,</li> </ul>             the caller information will not be displayed.           </li> </ul>
<p>You cannot dial the phone number edited in the caller list.</p>	<ul style="list-style-type: none"> <li>● The phone number you dialed might have an incorrectly edited pattern (for example, the long distance "1" or the area code is missing). Edit the phone number with another pattern (see "Editing a caller's phone number before calling back" on page 45).</li> </ul>

The unit does not record new messages.	<ul style="list-style-type: none"><li>● The answering system is off. Turn it on (see “Turning the answering system on/off ” on page 57).</li><li>● The caller’s message length is set to “<b>Greeting Only</b>”. Select a different setting (see “Caller’s message length” on page 64).</li><li>● The message memory is full. Erase unnecessary messages (see “Erasing a message” on page 61).</li><li>● If you subscribe to the Voice Mail service, messages are recorded by the telephone service provider not your telephone (see “For Voice Mail service subscribers” on page 64).</li></ul>
“ <b>Memory Full</b> ” flashes on the display, and no new messages are recorded.	<ul style="list-style-type: none"><li>● The message memory is full. Erase unnecessary messages (see “Erasing a message” on page 61).</li></ul>
You cannot listen to messages from a remote location.	<ul style="list-style-type: none"><li>● A touch tone phone is required for remote operation.</li><li>● Enter the remote code correctly (see “Remote code” on page 62).</li><li>● The answering system is off. Turn it on (see “Turning the answering system on/off ” on page 57).</li><li>● The answering system may not respond if the tones are too short to activate the unit. Press each button firmly.</li><li>● If you enter the wrong remote code, hang up and then try again.</li></ul>
While recording a greeting message, the unit starts to ring and stops recording.	<ul style="list-style-type: none"><li>● A call is being received. Answer the call and start again after hanging up.</li></ul>
During playback, incoming call tones are heard.	<ul style="list-style-type: none"><li>● A call is being received. Answer the call and start again after hanging up.</li></ul>
You have a difficulty in intercepting a call during message recording.	<ul style="list-style-type: none"><li>● “<b>Intercept Call</b>” is turned off. Turn it on (see “Turning the intercept call on/off ” on page 58).</li><li>● Use a phone connected to the line of the incoming call.</li></ul>

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the bottom of this equipment is a label that contains, among other information, a product identifier in the format US:ACJ-----. If requested, this number must be provided to the telephone company.

- Registration No.

.....(found on the bottom of the unit)

- Facility Interface Code.....02LS2

- Service Order Code.....9.0F

- Required Network Interface Jack

.....RJ11C, RJ14C

- Ringer Equivalence No.

(REN).....0.3B

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with the product. It is designed to be connected to a compatible modular jack that is also compliant.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that

## Useful Information

---

This equipment is hearing aid compatible as defined by the FCC in 47 CFR Section 68.316.

### WHEN PROGRAMMING EMERGENCY NUMBERS AND(OR) MAKING TEST CALLS TO EMERGENCY NUMBERS:

- 1) Remain on the line and briefly explain to the dispatcher the reason for the call.
- 2) Perform such activities in the off-peak hours, such as early morning or late evenings.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be

determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

	5 °C – 40 °C (41 °F – 104 °F)
	Approx. height 105 mm x width 245 mm x depth 225 mm (4 <sup>1</sup> / <sub>8</sub> inches x 9 <sup>21</sup> / <sub>32</sub> inches x 8 <sup>7</sup> / <sub>8</sub> inches)
	Approx. 1,090 g (2.4 lb.)
	Standby: Approx. 5 W (PQLV210Z) Maximum: Approx. 8 W (PQLV210Z)
	AC adaptor (120 V AC, 60 Hz)

## Panasonic Telephone Products Limited Warranty

### Limited Warranty Coverage

If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Company or Panasonic Puerto Rico, Inc. (collectively referred to as "the warrantor") will, for the length of the period indicated on the chart below, which starts with the date of original purchase ("Limited Warranty period"), at its option either (a) repair your product with new or refurbished parts, or (b) replace it with a new or a refurbished product. The decision to repair or replace will be made by the warrantor.

#### Parts

**One (1) Year**

#### Labor

**One (1) Year**

During the "Labor" Limited Warranty period there will be no charge for labor. During the "Parts" Limited Warranty period, there will be no charge for parts. You must mail-in your product prepaid during the Limited Warranty period. This Limited Warranty excludes both parts and labor for batteries, antennas, and cosmetic parts (cabinet). This Limited Warranty only applies to products purchased and serviced in the United States or Puerto Rico. This Limited Warranty is extended only to the original purchaser and only covers products purchased as new.

### Mail-In Service

For assistance in the continental U.S.A. in obtaining repairs please ship the product prepaid to:

**Panasonic Services Company Customer Servicenter**

**4900 George McVay Drive Suite B Door #12 McAllen, TX 78503**

For assistance in Puerto Rico call Panasonic Puerto Rico, Inc. (787)-750-4300 or fax (787)-768-2910.

When shipping the unit carefully pack, include all accessories, and send it prepaid, adequately insured and preferably in the original carton. Include a letter detailing the complaint and provide a day time phone number where you can be reached.

**IF REPAIR IS NEEDED DURING THE LIMITED WARRANTY PERIOD THE PURCHASER WILL BE REQUIRED TO FURNISH A SALES RECEIPT/PROOF OF PURCHASE INDICATING DATE OF PURCHASE, AMOUNT PAID AND PLACE OF PURCHASE. CUSTOMER WILL BE CHARGED FOR THE REPAIR OF ANY UNIT RECEIVED WITHOUT SUCH PROOF OF PURCHASE.**

### Limited Warranty Limits And Exclusions

This Limited Warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage. The Limited Warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor, or failures which result from accidents, misuse, abuse, neglect, bug infestation, mishandling, misapplication, alteration, faulty installation, set-up adjustments, misadjustment of consumer controls, improper maintenance, power line surge, lightning damage, modification, introduction of sand, humidity or liquids, or rental use of the product, or service by anyone other than a Factory Servicenter or other Authorized Servicer, or damage that is attributable to acts of God.

**THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER "LIMITED WARRANTY COVERAGE". THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS LIMITED WARRANTY.** (As examples, this excludes damages for lost time, lost calls or messages, cost of having someone remove or re-install an installed unit if applicable, travel to and from the servicer. The items listed are not exclusive, but are for illustration only.) **ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.**

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the exclusions may not apply to you.

This Limited Warranty gives you specific legal rights and you may also have other rights which vary from state to state. If a problem with this product develops during or after the Limited Warranty period, you may contact your dealer or Servicenter. If the problem is not handled to your satisfaction, then write to the warrantor's Consumer Affairs Department at the addresses listed for the warrantor.
